SUMMARY

Final-year Computer Science student focused on Data Science and applied analytics. Hands-on experience in data preprocessing, exploratory analysis, and machine learning. Proficient in Python and SQL with exposure to batch data workflows and cloud environments.

EDUCATION

CMR University

B.Tech in Computer Science

CGPA: 7.9

2022 – 2026 (Expected)

Coursework: DBMS, Data Mining, AI, Machine Learning, DSA.

EXPERIENCE

Beta Tester (Confidential Program)

OPPO 2025 – Present

- Testing unreleased smartphone devices under strict confidentiality
- Performing functional, performance, and regression testing on mobile devices
- Rigorously testing all device features across multiple usage scenarios
- Reporting issues using OPPO internal feedback application
- Logging structured bug reports with clear reproduction steps
- Verifying fixes after monthly OS updates

Data Preprocessing Intern

LucidML, Bangalore Oct 2025 – Jan 2026

- Worked with Python scripts in Jupyter Notebook for dataset preparation
- Executed and monitored batch processing scripts on a VM environment
- Handled large datasets and ensured successful script completion
- Monitored failures and re-triggered jobs when required
- Performed basic validation checks on processed data
- Gained exposure to software development lifecycle (SDLC) in data workflows

AI Intern

AICTE – TechSaksham (Microsoft & SAP) Feb – Apr 2025

- Worked on Medical Imaging Data Analytics project
- Performed data cleaning and preprocessing using Pandas and NumPy
- Conducted exploratory analysis on symptoms and disease patterns
- Generated visual insights using bar and line charts
- Built a Streamlit dashboard to present analytical summaries
- Presented system workflow and project outcomes

SKILLS

Programming: Python, SQL

Databases: MySQL, MongoDB

Libraries: Pandas, NumPy, Matplotlib

Tools: Git/GitHub, VS Code, Jupyter, PyCharm

Testing: Manual testing, bug reporting

Soft Skills: Problem-solving, communication, teamwork

PROJECTS

Financial Document Processing System

Python, CNN, OCR (Tesseract), Flask Ongoing

- Built an invoice fraud detection system using Python
- Used Kaggle invoice image dataset and manually tampered samples to simulate fraud
- Trained a CNN model for visual anomaly detection
- Implemented OCR using Tesseract to extract totals and key fields
- Applied hybrid logic combining OCR rules and model confidence
- Developed a Flask web app to upload invoices and display results
- Project is under active development with continuous improvements

ResQ – Disaster Analytics System (Group Project)

AI Concepts, Satellite Data, Documentation 2025

- Understood the end-to-end workflow of an AI-based disaster response system
- Learned how satellite and drone data supports disaster detection
- Assisted with data validation and documentation
- Contributed to system flow explanation and presentations
- Project received awards at CAUSE 2025

Medical Imaging Data Analytics System

Python, Pandas, Matplotlib, Streamlit 2025

- Performed data cleaning and preprocessing using Pandas
- Conducted exploratory analysis on symptoms and diseases
- Generated bar and line graphs using Matplotlib
- Built Streamlit dashboard for non-technical users

CERTIFICATIONS

- OCI Data Science Professional – Oracle (2025)
- OCI Generative AI Professional – Oracle (2025)
- Data Analysis Essentials – Microsoft & LinkedIn (2025)
- Career Essentials in Data Analysis – Microsoft & LinkedIn (2025)
- Python (Basic) – HackerRank (2025)
- SQL (Basic) – HackerRank (2025)

ACHIEVEMENTS

- First Runner-Up – CAUSE 2025 (ResQ)
- Spirit of Innovation – CAUSE 2023

LEADERSHIP

Rotaract Member

- 60+ hours community service
- Tree plantation & disaster relief
- Career guidance for students

ADDITIONAL

Languages: English, Hindi, Kannada, Telugu; basic Tamil

Interests: Writing, Movies, Vibe Coding

Co-curricular: Active participant in technical workshops and hackathons
